Use A 10-Watt Solar Panel To Charge 12 Volt Batteries. Solar panels are everywhere now, and it's easy to understand why. Being able to generate energy without using gas generators is pretty darn cool, and if you're working on a project at home or want to charge a 12V battery without using regular AC outlets and battery chargers, a 10-watt solar panel can ...

I'm trying to measure the output of a 12V, 10W solar panel using an arduino connected to voltage and current sensors. What can I use as the load for the solar panel? At first I was just going to use a resistor, but I have read that the load can affect the power generation.
