Solar panels have great lifespans, and a 12-volt system can last up to 30 years if it's maintained properly. As opposed to some of the higher voltage solar panels available, 12-volt solar panels are cheaper than most others. Lastly, if somehow the solar panel stops working or breaks, parts for 12-volt systems are always readily available.

These 12v off-grid solar systems include everything you need to fit and run a low consumption power grid on a small building, garage, cabin, caravan or other application. This DIY kit has been carefully selected to balance cost, quality and long-term reliability in a straightforward package.
