A 1 kW solar system produces roughly 4 units/day. Hence, a 1MW system will generate (4 units x 1000 kW) = 4,000 units/day, as 1MW = 1000kW. Hence, the monthly power generation will be 1,20,000 units and the yearly power generation will be 14,40,000 units. So, you need to keep your power requirements in mind in order to choose the best solar plant.
