

The European Union's energy storage sector has witnessed significant advancements, particularly in 2023, with a record-breaking milestone of over 10 GW of cumulative storage installations. This growth is driven by the increasing adoption of battery storage technologies, especially in residential sectors across Europe, with Germany, Italy, and the UK leading the charge.

International Conference on Green Energy and Environment Engineering scheduled on July 04-06, 2024 at Seoul, Republic of Korea is for the researchers, scientists, scholars, engineers, academic, scientific and university practitioners to present research activities that might want to attend events, meetings, seminars, congresses, workshops, summit, and symposiums.
