The LP210-M-66-MH-Bifacial solar panel by Lepton Solar represents a remarkable advancement in solar technology, offering exceptional performance and versatility. With a power output ranging from 640 to 655 watts, it stands as a powerful and flexible solution ideal for various applications, from residential rooftops to large-scale commercial installations.

The standard solar panel weight in the UK is 18 - 21kg for residential settings and 22 - 30kg for commercial settings. These include the weights of the frames and mounting equipment. Most modern rooftops have a rafter load of 140kg per square metre. For reference, solar panels usually weigh approximately 20kg per square metre.
