An Anderson shelter standing intact amid a scene of debris in Norwich. The Anderson shelter was designed in 1938 by William Paterson and Oscar Carl (Karl) Kerrison in response to a request from the Home Office. It was named after Sir John Anderson, then Lord Privy Seal with special responsibility for preparing air-raid precautions immediately prior to the outbreak of World War ...

The article deals with the problematic heritage associated with the system of Nazi German underground air raid shelters currently located within the Polish state, in the Baltic port city of Szczecin. The unwanted heritage has been inventoried, archival materials collected, and comparative analyses made of ways in which the underground space can be revitalised. ...

Recently, the Concrete Society came across an excellently produced booklet issued by the Cement and Concrete Association on the topical subject of air raid shelters. It provided us with ...

Air raid shelters were also known as bomb shelters and were created to protect people during bomb attacks from the enemy air craft. During the second world war, a number of underground stations were used as mass air raid shelters. This photo from 1940 shows people sheltering from shelling at Bounds Green. ... Company: Grizli777 Other titles:

The entire network forms a complex web, allowing access from one shelter to another. Before this revelation, explorers spent over a month investigating the site and discovered 18 air raid shelters in the mountain, each with dimensions of six meters in height and width. The longest shelter stretches an impressive 520 meters.

In their embryonic state, the tunnels were designed as short term air raid shelters with the long-term view of being transformed into an express North South crossrail. That never happened, instead the tunnels went from being air raid shelters to being lived in before being used as a storage facility and finally becoming home to our farm.

Heinemann Prefabrication System of Air Raid Shelters A system design for a prefabricated shallow

Air-raid shelter for energy storage companies

underground air raid shelter has been preserved in the State Archive in Szczecin. The documentation was produced by the Berlin firm Heinemann & Co. in 1942 and consists of plans, cross-sections, construction details of each prefabricated element ...

These air-raid-shelters-turned-residences are the brainchild of architect Rainer Mielke, who lives in one himself. He has transformed another 13 or so into working or living spaces, which all differ vastly. One block of flats, for example, ...

During the Second World War, local people sought protection from bombing raids in public air raid shelters. Homeowners could also assemble smaller shelters in their own gardens. Garden ones were called Anderson shelters. These were issued free to homes earning less than £250 a year. Those on higher wages were charged £7 for a shelter.

Crowded and uncomfortable air raid shelters became a feature of the urban landscape across Britain during the Second World War (1939-45) as the bombers of Nazi Germany systematically hit cities from 1940. The London Blitz was a particularly sustained period of bombing which civilians escaped from by diving into private or public shelters when the ...

Sarina Air Raid Shelter is a heritage-listed former air raid shelter at Broad Street, Sarina, Mackay Region, Queensland, Australia was built in 1942. It was added to the Queensland Heritage Register on 3 May 2019. [1]The Sarina Air Raid Shelter stands in the median strip of Broad Street (Bruce Highway) in Sarina, about 25 kilometres (16 mi) south of Mackay.

The city of Valencia preserves a large number of vestiges of that time, among them, more than three hundred air-raid shelters. In this article we consider these ... Especially in companies which supplied war materials, provided storage, or produced energy. o Examples: Bombas Gens, Macosa, or the extinct factory in Carrer Marqués de Caro. ...

Life in Air-Raid Shelter 307. When the construction of Refugi 307 began, a network of tunnels spanning 400 metres in length was designed, with the idea that it would fit around 2000 people in it, but by the time the war had ended, only half of these tunnels had actually been constructed. The tunnels are approximately 2.1 metres high and have a width ...
