

Key Finance-ability Provisions: Energy storage resources may also be financed on a nonrecourse basis and, like any other project financed in such manner, will need to address issues upon which nonrecourse lenders will focus, including assignment, events of default, performance requirements, key dates, and collateral.

For standalone energy storage contracts, these are typically structured with a fixed monthly capacity payment plus some variable cost per megawatt hour (MWh) of throughput. For a combined renewables-plus-storage project, it may be structured with an energy-only price in lieu of a fixed monthly capacity payment.

It's generation . . . it's transmission . . . it's energy storage! The renewable energy industry continues to view energy storage as the superhero that will save it from its greatest problem--intermittent energy production and the resulting grid reliability issues that such intermittent generation engenders.

The following key terms and issues are useful in the negotiation of energy storage procurement contracts. MW and MWh: An "MW" is a unit of power and describes the instantaneous rating of power at any given moment in time. It is the equivalent of 1,000,000 watts, or 1,000 kilowatts. An "MWh" is a unit of energy and is the amount of ...
