

Battery Energy Storage System (BESS) is one of Distribution's strategic programmes/technology. It is aimed at diversifying the generation energy mix, by pursuing a low-carbon future to reduce the impact on the environment. BESS is a giant step in the right direction to support the Just Energy Transition (JET) programme for boosting green energy as a renewable alternative source.

This revolutionized how tenders are managed within our Supply Chain Management (SCM) division. By transitioning from a cumbersome, manual process to a streamlined digital platform, we have significantly enhanced efficiency, transparency, and accessibility for businesses of all sizes. The eTender portal now handles over a million documents ...

With the rapid growth of 5G technology, the increase of base stations not only brings high energy consumption, but also becomes new flexibility resources for power system. For high energy consumption and low utilization of energy storage of base stations, the strategy of energy storage regulation of macro base station and sleep to save energy of micro base ...

Firstly, the technical advantages of gNBs are apparent in both individual and group control. From an individual control perspective, each gNB is equipped with advanced energy management technology, such as gNB sleep [2], to enable rapid power consumption reduction when necessary for energy savings. Moreover, almost every gNB is outfitted with a ...
