How can Egypt facilitate future exchange of electricity across the Mediterranean?

Egypt continues to work with the European Union to evaluate feasible options to facilitate future exchange of electrical power across the Mediterranean, particularly from renewable energy sources, through possible interconnections between Tunisia and Italy, and potentially between Egypt, Cyprus and Greece.

What is Egypt's import dependence rate for fossil fuels?

According to Egypt's ISES, the import dependence rate for fossil fuels reached 10% in 2014/15, and in the reference case scenario from that report, which is the basis of the Reference Case of this report, the share is expected to reach 50% in 2034/35.

Thermal energy storage tanks take advantage of off-peak energy rates. Water is cooled during hours off-peak periods when there are lower energy rates. That water is then stored in the tank until it's used to cool facilities during peak hours. This helps reduce overall electric usage by shifting a cooling system's power consumption from ...
