

Can a moisture-proof cabinet store tea

Can tea be stored in the refrigerator?

No, storing most tea in the refrigerator will actually expose it to moisture and condensation, thereby reducing the shelf life! It's better to just store your tea in a cool, dry place like a cabinet away from appliances like stoves or ovens. The only tea that is best to store in the refrigerator is matcha. How long does tea last?

Is it suitable to store tea in a kitchen cabinet?

Although it might be a common practice, your kitchen cabinet is not a good place to store tea. This is because residual enzymes in the tea leaves and trace oxygen in the tea pack continue to change the chemical composition of the tea, a process that is accelerated by heat.

What is the moisture level of tea?

A properly processed tea has a moisture level between 3 to 6%. That is why it is important to keep tea in a very airtight container, as tea acts as a powerful absorption agent and can be used as a deodorizer or dehumidifier.

How should I store my tea?

When it comes to storing tea, there are a few important things you will want to avoid such as: air exposure, light exposure, moisture, heat, and strong odors. In order to keep your tea in its best and freshest condition, you will want to store it in a container that helps avoid the above-mentioned threats to your tea.

Can you store tea in a closed cupboard?

If you can not store your tea in a closed cupboard, consider opaque containers. Glass or other see-through jars and pouches may be a fun way to store tea so you can beautifully display and present them but these types of containers will let light through. Therefore, it is not a proper way to store tea long term.

What is the ideal temperature to store tea?

The ideal temperature for storing tea is between 20 to 25°C. When storing tea in porous containers, the optimum relative humidity is between 60 to 70%. Some argue for storing tea at higher humidity to hasten aging, but the resultant tea is rarely clean tasting and may sacrifice sweetness.

This storage cabinet is made from solid acacia wood that's naturally water- and UV-resistant, so you can use it outside to store pool toys or garden essentials. Slats on all three sides and louvre paneling on the door give this cabinet a breezy coastal farmhouse look.
