

Costa Rica has the highest electricity rates in Central America (according to GlobalPetrolPrices , in March 2020, the costs for electricity were 0.15 US\$/ kilowatt-hour (kWh) for households and 0.20 US\$/kWh for businesses). However, the modest waste output of Costa Rica as a whole probably does not justify mass burn incineration.

Burglary resistant safe. High security burglary resistant safe with UL Listed certification mark, SEYMA Bx6 3520. As required by customer the safe could be manufactured with one or two mechanical or electronic UL Listed locks, as specified by UL 687 standard. This safe is also manufactured in different sizes: 4720, 5920, 5927, 6533 and 7027, all of them approved by UL.

$0.84 * 5 = 4.2$ , so for every solar panel we need 4.2MJ of storage. One storage tank of 165 degree steam holds  $750\text{MJ} / 4.2 = 178.571428571$  solar panels per steam tank. For 1 solar panel you thus need  $1 / 178.571428571$  steam tanks or 0.056, same as your result. Now a little extra math just to juggle your numbers around:

I got to see the seven surviving steam locos in Costa Rica about which I know last week. Three of these locos are Baldwin Mikes from the Ferrocarril del Sur which, despite being a common carrier, was essentially a banana system on the Pacific coast close to the border with Panama run by the United Fruit Co. ... There's a truly delightful 22 ...

We make a wide variety of fuel storage tanks. Capacities range up to 50,000 gallons for factory built tanks. Multiple tanks can be linked together to increase capacity. We also design and build field erected tanks. Factory built tanks are available in a variety of configurations: vertical, horizontal, skid-mounted, portable, split compartments ...
