

# Customs code for household energy storage system

What is a commodity code?

Commodity codes are internationally recognised reference numbers. A code describes a specific product when importing or exporting goods. You will use this code on any import declaration and can find them in the Trade Tariff tool. You'll need to find the right commodity code for any goods you import or export, as it works out:

What are customs declarations & commodity codes?

Customs declarations and commodity codes are a shared responsibility between the United Kingdom Border Agency, which manages customs in the UK, and Her Majesty's Revenue and Customs (HMRC) Customs Declaration Service. Other countries around the world use different commodity code systems.

What if I rely on a commodity code from an overseas supplier?

If you rely on the commodity code from an overseas supplier, you'll need to check if the treatment is the same and how much of the code applies in the UK. How to use the Trade Tariff tool or get help to classify your goods, so you pay the right amount of Customs Duty and import VAT.

How do I insert a commodity code into my paperwork?

To be able to insert a commodity code into your paperwork (for exports as well as for imports), you will need the details of the product or good you are importing (or exporting). This generally includes the internationally established Harmonised Tariff System (HS) code, while the last four digits are for use with the UK and EU.

What is a UK commodity code?

They apply to both imported and exported goods and are handled by national customs authorities at borders. In the United Kingdom, commodity codes are generally between 8 to 10 digits in length. This combines the 6-digit Harmonised System (HS) code and a country-specific code.

What is a harmonised system code?

A Harmonised System (HS) code is a global commodity code organisational system through the Harmonised Commodity Description and Coding System. It is used to standardise and categorise traded goods for customs and taxation purposes. The Harmonised System has been in place since 1988 and is utilised around the world by the majority of countries.

**Purpose of Review** This article summarizes key codes and standards (C& S) that apply to grid energy storage systems. The article also gives several examples of industry efforts to update or create new standards to remove gaps in energy storage C& S and to accommodate new and emerging energy storage technologies.  
**Recent Findings** While modern battery ...

of a customs declarations, shall apply. {The Code has been supplemented with Article 31 according to the
