Mounting brackets are essential components for installing solar panels, as they secure the panels in place, ensuring stability and optimal positioning for maximum sun exposure. By improve solar energy capture efficiency by optimizing the angle and position of the solar panels, while providing stability and safety.

To create a solar panel fixing bracket, the first step is to design the metal stamping die of the fixing bracket on a computer. This design is then sent to a machine called a stamping press. After the metal stamping dies of the fixing bracket are designed, the second step is die assembly, testing, and proofing: The stamping press uses a die and punches set to cut ...
