

The global energy storage systems market recorded a demand was 222.79 GW in 2022 and is expected to reach 512.41 GW by 2030, progressing at a compound annual growth rate (CAGR) of 11.6% from 2023 to 2030.

In its draft national electricity plan, released in September 2022, India has included ambitious targets for the development of battery energy storage. In March 2023, the European Commission published a series of recommendations on policy actions to support greater deployment of electricity storage in the European Union.
