

Encourage business owners to store energy

How can a small business save money on energy costs?

By looking at your company's energy consumption one area at a time, it will help to make the process of saving on small business energy costs a little more manageable. Let's look at heating, ventilation and air conditioning systems (known as HVAC). Here are some office energy saving tips for your HVAC: Eliminate heating/cooling loss.

How can I save energy at work?

One of the easiest ways to save energy at work is to look for the places heat (or air conditioning) can escape. There's no point in paying to heat or cool the outdoors! Have the energy-auditor check windows and doors for leaks. Pro tip: if you decide not to have an energy audit, you can check for leaks yourself.

Do small businesses get tax incentives if you buy energy-saving equipment?

Some local governments provide tax incentives and rebates to small businesses if you buy energy-saving equipment. The U.S. Small Business Administration estimates that heating, ventilation and air conditioning systems account for about 40% of the electricity used in commercial buildings.

How much energy does a small business use?

Many small businesses reside in commercial buildings smaller than 50,000 ft², which consume 44% of U.S. commercial building energy use (nearly 3 quadrillion Btu annually). There are three key reasons small business owners should improve the energy efficiency of a building:

How can businesses help create a sustainable future?

By collaborating with state and local governments, as well as energy providers, businesses can help create a sustainable future that balances environmental goals with economic growth.

Can small commercial office buildings achieve 20% energy savings cost effectively?

Research was conducted to develop Energy Efficiency Measure (EEM) packages for small commercial office buildings that achieve 20% energy savings cost effectively, the results of which are summarized in a simple spreadsheet tool called the Energy Efficiency Measure (EEM) Selection & Cost Evaluation Tool Microsoft Excel.

And the Community Navigators Pilot Program has awarded nearly \$100 million in funding to 51 organizations that will work with hundreds of local groups to connect small business owners to government resources and help level the playing field for America's entrepreneurs.
