

Energy storage smart lock purchase

Are smart locks a good investment?

Smart locks carry a hefty price compared to their traditional counterparts, so they need to offer reliable and useful smart features to be a worthwhile purchase. We used every smart feature these locks offer, side-by-side, to assess both the relative usability and reliability of all of them.

What are the benefits of a smart lock?

The main advantage of a smart lock is keyless entry into a home. Smart locks also allow owners to monitor entry into and activity around the door, assign codes for limited access, integrate with virtual assistants and smart-home systems, and lock or unlock their door remotely. Other features include:

How much do smart home locks cost?

Smart home locks cost around \$100 for basic models, while more advanced models with features like voice commands, push and email notifications, and tamper alarms cost between \$200-\$300. Consider factors such as price, installation, and smart home automation before buying a smart lock.

Do smart locks make your home safer?

These smart home devices allow you to unlock doors from anywhere through an app on your phone, or they can open when you're in close proximity to your front door. While smart locks won't necessarily make your home any safer, they do allow for more control and efficiency.

How does a smart lock work?

A smart lock needs to be able to communicate with the rest of your smart home setup and with your phone. Most will do that using one of three common communication protocols: Bluetooth, Z-Wave or Wi-Fi. There are pros and cons to each, so you'll want to be sure to understand the differences before making a purchase.

How much does a smart door lock cost?

Smart locks cost between \$100 and \$300 depending on the setup and accessories needed. There are no monthly fees associated with the use of a mobile app for smart locks--the cost is solely from the hardware and installation.

Smart locks are especially great for those with kids, pets, elderly family members, or anyone who simply wants to be able to easily lock and unlock the door both when arriving home and remotely.
