

Five-year-old Lego solar power station

Did solar power lure Lego to Virginia?

Solar power helped lure Lego to the state of Virginia, where it plans to build its first ever US factory complete with an on-site PV array.

Does Lego have a solar power plant?

The Lego Group already makes solar-themed kits with its iconic bricks, but this time it's for real: the new factory will sport an on-site solar power plant big enough to match its entire electricity demand. Solar Power Vs. Wind Power On The Atlantic Coast

Why is Lego launching a solar park in Virginia?

The new Lego announcement provides the PV industry in Virginia with a high profile example of the power of renewables to attract new business. "The location in Virginia allows us to build a solar park which supports our sustainability ambitions and provides easy links to country-wide transportation networks.

Is a Lego solar farm ready for Lego Ideas?

When she texted back a photo of a LEGO solar farm her kids had built (without us previously talking about this!), it seemed like something that was ready for LEGO Ideas. Here in Minnesota, USA, most solar farms use a diverse mix of deep-rooted grasses and flowering plants under and around the panels.

Is Lego doing its solar energy homework?

Evidently Lego has been doing its solar energy homework. Last year the company's fan-friendly new product incubator featured an expandable solar energy array complete with beehives, pollinator habitat, and grazing sheep, all of which are elements in the overlapping fields of regenerative agriculture with agrivoltaics.

Will Lego make a solar farm a real-world kit?

If 10,000 people with a free LEGO Ideas account vote for this idea, LEGO will consider making it a real-world kit! Solar farms, also called solar parks, are increasingly common worldwide and a lot more will be built over the next several years.
