

# How to install the photovoltaic panel by ladder

### How to install solar panels?

Make space for the solar panel accessories (solar inverter, cables and solar batteries, if desired), for instance in a plant room 4. Plan a day for installation 5. Erect the scaffolding (this can be done by your supplier or by a company you organise) 6. The solar panel mounts will be installed 7. The professionals will install the solar panels 8.

### How do you install solar panels on a roof?

Usually, there is a clipping mechanism that is fastened with bolts. Bolts on solar mounting equipment come with nice utilities for single-tool fastening and do not require special spanners; a hex Allen key or a spanner is likely all you need. Roof rails ready for the installation of solar panels.

#### How does a solar panel installation work?

The installer will have to lift some of the roof tiles to fix the anchors to the rafters in the loft. This will give the solar panel mounts a stable foundation, and will make sure they don't get damaged in stormy weather. Once the roof anchors have been fixed to the property, the installer will attach the solar panel mounting system to them.

### Can I go off-grid with my DIY solar panel installation?

Yes, you can go off-grid with your DIY solar panel installation. We have solar panel kits for both on-grid and off-grid use. They are the ideal solution to our energy requirements and can power any property or leisure vehicle. Conclusion

#### How do you lift solar panels to the roof?

I finished installing my DIY solar system grid tie 7.1KW on th end of 2019, but I want to share with you guys the methods I used to lift the panels to the roof. For the first 16 panels I run a steel cable between two tall trees over the top of the house. Used a pulley system to lift it and move the panel to the roof. You can see it on this video:

#### Can solar panels be installed on a loft?

Before an installer is able to crack on with the actual installation, a professional surveyor will need to go into your loft and check the integrity of both the roof and the rafters. This is a key part of the process, as they will assess whether it's safefor you to have solar panels on your roof.
