DIY installation can be cheaper but may result in improper installation and may invalidate your manufacturer warranty. DIY kits are easier to install than DIY installing solar panels yourself but purchase costs can be ...

I use several ATSs (automatic transfer switches) to connect my off-grid solar to the house. When the PV -> battery charges up enough to turn on the Inverter - the Inverter power flips the ATSs from grid to inverter. When the batteries run down and the inverter goes off, the ATSs automatically switch back to grid.

The shift towards renewable energy sources is accelerating globally, and solar power stands at the forefront of this green revolution.
