

Is foreign help enough to fix Iraq's energy problems?

Foreign help is not enough to fix energy issues, domestic reform is necessary. This past July, Iraq and France's TotalEnergies finalized the Gas Growth Integrated Project, a \$27 billion energy deal aimed at Iraq's natural resources and improving the country's electricity supply.

Does Iraq have a reliable electricity grid?

Now, two decades after the 2003 US invasion, Iraq has failed to see improvements in the electricity infrastructure. Although the disparity between supply and demand is widening due to population increase and rising temperatures, corruption remains the largest obstacle to a reliable electricity grid.

Why is Iraq's energy system vulnerable?

However the capacity to capture and process this gas has not kept pace. The inability to utilise its gas riches means that the country's gas deficit has grown, and Iraq now relies on imports from Iran to meet increasing demand. This has introduced a number of vulnerabilities to Iraq's energy system.

Can Iraq achieve energy self-sufficiency without regional aid?

However, the path to energy sufficiency remains a considerable challenge for Iraq even with regional aid. Without domestic reforms to address the underlying causes of the energy crisis, Iraq's journey towards achieving energy self-sufficiency is still a considerable distance away.

How can Iraq achieve a balance between oil and gas?

Striking the right balance Iraq is fortunate to have natural resources, but the historical dominance of oil and gas creates a challenge. Eliminating gas flaring and reducing methane emissions is a welcome first step.

Will Iraq be able to connect to the GCC electricity grid?

Another planned power initiative aims to connect Iraq to the GCC electrical grid. This endeavor envisions delivering 1.8 gigawatts of electricity by 2025, stretching from the al-Wafra station in Kuwait to Iraq's Al-Faw station in the south.
