

Is the solar power roof leak-proof

Leak-Proof: Metal roofs, when installed correctly, are practically leak-proof. This ensures long-term protection for your home. When you add a carefully and correctly installed solar system to that, it's rare that the installer will need to come back to repair a roof leak. We only attach the L-foot mounts on the ridges of a metal roof.

In virtually all cases, the answer is no. Roof leaks after solar panels are extremely rare. When roof leaking after the solar panels are fitted does occur, however, it usually becomes evident very quickly after the installation process is finished. Almost always, homeowners will notice the leak within the first year, when it begins to rain or snow.
