

Will Italy support a centralised electricity storage system?

The European Commission has approved, under EU State aid rules a EUR17.7 billion Italian scheme to support the construction and operation of a centralised electricity storage system.

What is the EU state aid scheme for energy storage in Italy?

The European Union (EU) Commission has approved a state aid scheme aiming to fund the rollout of over 9GW/71GWh of energy storage in Italy. The scheme totalling EUR17.7 billion (US\$19.5 billion) will provide annual payments covering investment and operating costs for those developing, building and operating large-scale energy storage in Italy.

What is Italy's new energy storage scheme?

The scheme notified by Italy will support the construction of electricity storage facilities with a joint capacity of more than 9 GW/71 GWh. The scheme will run until 31 December 2033.

Does Italy need 9gw/71gwh of energy storage?

Italy's TSO Terna says it needs 9GW/71GWh of energy storage by integrate its renewables pipeline. Image: Terna. The European Union (EU) Commission has approved a state aid scheme aiming to fund the rollout of over 9GW/71GWh of energy storage in Italy.

How will Italy's electricity storage subsidies work?

After winning clearance in Brussels, Italy can now select companies developing electricity storage projects eligible for subsidies. The mechanism is set to cover investment and operating costs through annual payments.

What is Italy's state aid scheme?

REUTERS/Yara Nardi/File Photo Purchase Licensing Rights BRUSSELS, Dec 21 (Reuters) - The European Commission on Thursday said it had approved a 17.7 billion-euro (\$19.4 billion) Italian state aid scheme to support the development of a centralised system to store electricity from renewable sources.

The recent spate of investment announcements follows from the previous year when the likes of Innovo Group and Aquila Capital made significant investment commitments in the Italian energy storage sector. In November 2022, the newly launched Innovo Energy announced targeting a 1.5GW/9GWh Li-ion BESS portfolio in the UK and Italy.

Approved under EU state aid rules, the Italian scheme will support the construction of electricity storage facilities with a joint capacity of more than 9GW/71GWh and will run until 31 December 2033. The measure aims to facilitate the integration of renewable energy sources in the Italian electricity system, curbing supply-demand gaps resulting ...

Three projects in Italy's Lombardia, Piemonte, and Puglia regions. 14 February 2024, ITALY / UK / SINGAPORE - ACL Energy, a Milan-based battery energy storage developer, today announces a joint venture partnership with BW ESS, an energy storage business dedicated to building, owning, and operating large scale batteries globally, and Penso Power, a London ...

From ESS News The US Bureau of Land Management (BLM) on Monday issued a final decision approving Arevia Power's \$2.3 billion, 700 MW solar, plus 700 MW/2.8 GWh battery storage Libra Solar project, the biggest colocated project in the state of Nevada. The project, developed by Arevia Power about 30 kilometers south of the Fort Churchill substation ...

On November 27, the National Energy Administration released its No. 5 announcement for 2020, approving 502 energy industry standards. Seven of the announced standards relate to energy storage, covering areas including supercapacitors for electric energy storage, code specifications for traceability of electrochemical energy storage systems, design ...

Storage power plants; Pumped storage power plants; Projects; New renewable energy sources. ... Atel acquires Italian power stations. 03/18/2002, 13:53 ... Atel is pleased at the deals approval, which gives the company its own production capabilities in Italy. This marks a further step in the strategy of extending Atels strong existing position ...

Transmission system operator (TSO) Terna estimates Italy will need 9GW/71GWh of new energy storage to integrate its growing renewables pipeline, an average duration of just under 8 hours. That duration will be split between battery energy storage system (BESS) and select pumped hydro energy storage (PHES) projects, though even on the BESS ...

published on 17th November 2021 With the Decreto Semplificazioni Bis (Act No. 108 of 29 July 2021), the Italian legislator aims to simplify both the procedure for the issuance of approvals for the construction of RE power plants and for conducting the Environmental Impact Assessment to be completed in parallel with the approval process.

Aura Power is developing over 1GW of battery storage projects in Italy, it said. Image: Aura Power. UK-based Aura Power has announced the final approval for a 200MW/800MWh battery energy storage system (BESS) in Italy, confirming Energy-Storage.news' recent article.. A ministerial decree was issued last week confirming the ...

The European Union (EU) Commission has approved a state aid scheme aiming to fund the rollout of over 9GW/71GWh of energy storage in Italy. The scheme totalling EUR17.7 billion (US\$19.5 billion) will provide annual payments covering investment and operating costs for those developing, building and operating large-scale energy storage in Italy. It will be ...

The European Commission (EC) has greenlit a EUR-17.7-billion (USD 19.4bn) Italian scheme to aid the construction of more than 9 GW/71 GWh of electricity storage facilities, it announced on Thursday. The scheme will run till the end of 2033 and will provide annual payments to electricity storage developers to cover their investment and operating ...

Wind turbines are seen along the A2 motorway near Salerno, Italy, January 14, 2021. REUTERS/Yara Nardi/File Photo Purchase Licensing RightsThe European Commission has approved an Italian state aid scheme potentially worth 35.3 billion euros (\$38 billion)

Ensuring "acceleration zones," wind and solar PV parks, and energy storage projects, Germany's federal cabinet on Wednesday approved a draft law aimed at shortening the project approval process, a move that fulfills the requirements of the European Union's 2023 Renewable Energy Directive.

Italy, bolstered by supportive policies, is expected to further integrate renewable power generation devices into its energy infrastructure. On February 27th, 2024, the Council of Ministers in Italy approved the National Recovery and Resilience Plan (NRRP).

Italy is launching a state aid package of EUR 17.7 billion for the establishment of a centralized electricity storage system. The scheme is for developers of eligible projects to ...

The Italian regulator, Gestore dei Mercati Energetici (GME), announced that the PUN will be abolished starting January 1, 2025, though it will continue to serve as a benchmark for long-term electricity contracts. The PUN is the national single price i.e. wholesale reference price of electricity purchased on IPEX - Italian Power exchange.
