

# Japan's local energy storage subsidies

According to Japan's 6th Strategic Energy Plan, battery storage will be increased as a distributed source of electricity closer to end users and within microgrids. This new policy calls for an increase in installed solar capacity from 79 gigawatts (GW) in ...

Details Battery Storage Subsidies in Japan. Introduction . In the Sixth Strategic Energy Plan, published by the Japanese Government in October 2021, targets are set to (a) achieve carbon neutrality by 2050; (b) increase the share of renewables as part of Japan's total electricity generation to 36-38% by 2030 (including 19-21% from solar and wind) compared to ...

The amendment of the Act on Promotion of Global Warming Countermeasures in 2022 enables local governments to set "promotion areas" for which the administrative procedures for the introduction of renewable energy projects will become simpler. ... which includes subsidies from the Japan Organisation for Metals and Energy Security ("JOGMEC ...

The nearly 50GW of battery storage that could be online by 2037 will increase the wholesale market revenues for wind and solar assets and thereby reduce the amount of subsidies paid to those assets out of general taxation through the EEG (Erneuerbare-Energien-Gesetz/Renewable Energy Sources Act) scheme, which is similar to the UK's contracts for ...

Electricity Storage in Japan IRENA International Energy Storage Policy and Regulation Workshop 27 March 2014 Düsseldorf, Germany ... Renewable energy in local area 1/2 Total 1bn JPY of METI: Ministry of Economy, Trade and Industry ... use of storage batteries. Subsidies for installations and demonstration projects (large-scale) ...

Japan joins Germany in offering direct subsidies for energy storage systems. Germany now offers subsidies for residential PV-plus-storage systems, although according to industry figures uptake on ...

In August 2024, Japan resumed government subsidies for electricity, gas, and petrol bills, aiming to curb inflation that reached its highest level in over a decade in 2023. While these subsidies provide a short-term stopgap measure to combat rising consumer prices, they also perpetuate one of the root causes of inflation: Japan's overdependence on imported fossil ...

Japan will provide as much as \$1.8 billion in subsidies for a slate of storage battery and chip-related projects, Industry Minister Yasutoshi Nishimura said on Friday, marking Tokyo's latest push ...

The Basic Act on Energy Policy, enacted in June 2002, is the foundation of Japan's energy policy. ... Some local governments may offer subsidies or incentives for the installation of small-scale renewable energy

## Japan's local energy storage subsidies

generation, but these vary by prefecture and municipality. ... Both storage batteries and pumped storage power plants are currently ...

Japan's energy policy is guided by the principles of energy security, economic efficiency, environmental sustainability and safety (the "three E plus S"). The 5<sup>th</sup> Strategic Energy Plan, adopted in 2018, aims to achieve a more diversified energy mix by 2030, with larger shares for renewable energy and restart of nuclear power.

To keep up, other markets such as Japan, South Korea, and India are also setting ambitious targets and allocating subsidies for energy storage. Japan's federal and local governments announced annual subsidy programs for utility-scale batteries, while South Korea set a 25GW/127GWh storage target by 2036.

Japan has seen a spate of storage battery projects announced in recent months. Many seek to take advantage of state subsidies as central and local governments push for more renewables. The goal is to encourage the installation of batteries to help the grid cope with more weather-reliant generation in the system.

The nascent grid-scale energy storage market in Japan now has its first-ever dedicated investment fund, and it will be jointly managed by Gore Street Capital, which launched one of the UK's. Gore Street, which launched Gore Street Energy Storage Fund back in 2018, announced this morning (4 December) that it has been selected along with ...

TOKYO -- Japan will require power utilities to open up their grids to energy storage systems operated by other companies, aiming to promote a technology that will be key to broader adoption of ...

Energy Storage. Japan's tremendous increase in solar and wind energy capacities in recent years have pushed the demand for standalone energy storage facilities in the country. ... battery facilities of minimum 10 MW capacity that can be independently connected to the grid are permitted to apply for subsidies equivalent to the fixed costs of the ...

Croatia will provide some EUR500 million (US\$534 million) in subsidies for battery energy storage system (BESS) technology, a government minister has said. Minister of Economy and Sustainable Development Damir Habijan revealed the funding, part of a larger EUR1.6 billion for energy projects, ...
