

Jinko Solar Mounting Standards

Where should Jinko Solar PV modules be installed?

2.2 Site Selection In most applications, Jinko solar PV modules should be installed in a location where they will receive maximum sunlight throughout the year. In the Northern Hemisphere, the module should typically face south, and in the Southern Hemisphere, the modules should face north.

What should I know before installing Jinko Solar?

As may be present. Do not remove any part installed by Jinko Solar or disassemble the module. All instructions should be read and understood before attempting to install, wire, operate and maintain the module. Don't lift up PV modules using the attached cables or the junction box. Do not touch live terminals.

Can Jinko Solar be used to replace a roof?

Do not use this module to replace or partly replace roofs and walls of living buildings. Do not install modules where flammable gas may be present. Do not remove any part installed by Jinko Solar or disassemble the module. All instructions should be read and understood before attempting to install, wire, operate and maintain the module.

What should I know about Jinko Solar?

Instructions. Do not remove any part installed by Jinko Solar or disassemble the module. All instructions should be read and understood before attempting to install, wire, operate and maintain the module. Don't lift up PV modules using the attached cables or the junction box. All PV systems must be grounded.

How much pressure does a Jinko module meet?

Weather stickers match. Jinko modules are designed to meet a maximum positive (or downward) pressure of 3600Pa (Only refer to the mentioned module type in this manual) and negative (or upward) pressure of 1600Pa. This design load was then tested with a safety factor of 1.5 times. So Jinko modules meet the requirements.

What is the length of a Jinko module?

Shown below in Figure 11. For Jinko standard full module L is 900/1200mm, the half-cut module L is 450/600mm, and the SWAN bifacial module L is 150/250mm. For customized module, L can be based on your condition. Please take the cable length into consideration before designing.

Jinko Solar Co., Ltd. (the "Company", or "Jinko Solar") (SSE: 688223) is one of the most famous and innovative solar technology companies in the world. Its business covers the core links of the photovoltaic industry chain, focusing on the R&D of integrated photovoltaic products and integrated clean energy solutions.

approved mounting methods. The professional system installer must be responsible for mechanical load calculation according to the system design. **2.2.2 Site Selection** In most applications, Jinko solar PV modules should be installed in a location where they will receive maximum sunlight throughout the year.

Jinko Solar Mounting Standards

should be installed in a location where they will receive maximum sunlight throughout the year.

Thanks for choosing JinKoSolar photovoltaic (PV) modules (hereafter referred to as "modules"). This manual provides important safety guidelines for the installation, maintenance, and use of ...

The assembly is to be mounted over a fire resistant roof covering rated for the application. Before mounting the module, please consult your local building department to determine approved roofing materials. The modules are qualified for application class A: Hazardous voltage (IEC ...

approved mounting methods. The professional system installer must be responsible for mechanical load calculation according to the system design. 2.2.2 Site Selection In most applications, Jinko Solar PV modules should be installed in a location where they will receive maximum sunlight throughout the year. In the Northern Hemisphere, the

short side frames as below drawing where "J" is 0mm and "K" is 240mm, complies with the mounting standards of Jinko Solar installation manual as shown following Figure 1 & 2. Figure 1 Figure 2 . Using these mounting methods will refer to following mechanical load value without considering safety factory 1.5 based on IEC 61215 standard:

below drawing where "J" is 0mm and "K" is 240mm, complies with the mounting standards of Jinko Solar installation manual as shown following Figure 1 & 2. Using these mounting methods will refer to following mechanical load value without considering safety factory 1.5 based on IEC 61215 standard: LONG SIDE CLAMPS

The standard power warranty for solar panels is 25 years, yet Jinko solar panels carry a 30-year performance warranty. This guarantees panel output will be more than 87 percent after 30 years. To make sure you get the ...

Statement for AU DG Mounting Solutions; CODE OF BUSINESS CONDUCT AND ETHICS; Jinko Solar Partner Code of Conduct; JinkoSolar-AU Limited Warranty; ... Jinko Solar Australia Holdings Co Pty Ltd. 2A 152 Marsden St, Parramatta NSW 2150 aus@jinkosolar +61 1300 326 182. Search. facebook; twitter; linkedin; email; Menu.

JinkoSolar serves more than 200 countries, is a global leader in photovoltaic sales, and pioneers "vertical integration" in production. JinkoSolar owns 10+ globalized manufacturing bases. JinkoSolar actively shapes industry standards, contributes to international frameworks, and promotes diverse applications of photovoltaic technology.

short side frames as below drawing where "J" is 0mm and "K" is 240mm, complies with the mounting standards of Jinko Solar installation manual as shown following Figure 1 & 2. Figure 1 Figure 2 Using these mounting methods will refer to following mechanical load value without considering safety factory 1.5 based

Jinko Solar Mounting Standards

on IEC 61215 standard:

For mounting with bolts, the following modules in tables 1 are applicable. The frame of each module has 8 mounting holes (Length* Width: 14mm*9mm) used to secure the modules to support structure. Always use all the eight mounting holes to secure the modules.

short side frames as below drawing where "J" is 0mm and "K" is 240mm, complies with the mounting standards of Jinko Solar installation manual as shown following Figure 1 & 2. Figure 1 Figure 2 Using these mounting methods will refer to following mechanical load value without considering safety factory 1.5 ...

.JINKOSOLAR 2 o The fire rating of this module is valid only when mounted in the manner specified in the mechanical mounting instructions. o The module is considered to be in compliance with UL 61730 only when the module is mounted in the manner specified by the mounting instructions below.

which the Module is installed, operated, used, and maintained are beyond JinKoSolar"s control. JinKoSolar disclaims any liability for infringement of patents and third-party rights that may result from the use of the products. Customers are not authorized to use any patents or patent rights, express or implied, by using JinKoSolar products.

the approved mounting methods. The professional system installer must be responsible for mechanical load calculation according to the system design. 2.2.2 Site . S. election . In most applications, Jinko Solar PV modules should be installed in a location where they will receive maximum sunlight throughout the year.
