

How many MW is a solar photovoltaic (PV) worth?

In the end, a total of 2,036 MW was awarded to solar photovoltaic (PV) in the first renewable energy auction held since July 2017. Overall, the auction had attracted offers worth 9,700 MW. The weighted average price for solar PV reached EUR 24.47 (USD 29.67) per MWh.

What is Portugal's first solar auction?

Portugal's first solar auction, allocated 1.15 GW of solar generation capacity - less than the 1.4 GW originally planned despite the exercise being oversubscribed. The country's second auction procured 700 MW procurement and awarded 670 MW with the world record lowest bid of EUR 0.0112/kWh (USD 0.0132) of the time.

How much is a solar PV project worth?

Overall, the auction had attracted offers worth 9,700 MW. The weighted average price for solar PV reached EUR 24.47 (USD 29.67) per MWh. The lowest price for solar, EUR 14.89/MWh, was submitted by Spanish energy group Ignis for a 30 MW project.

How much does a solar project cost in the UK?

Solar projects secured a strike price of GBP 50.07 (\$64.25)/MWh, almost 18% below the auction's ceiling price. Strike prices in UK CfD auctions are expressed in 2012 prices, with the generator receiving the equivalent adjusted for inflation. In total, 131 bids were successful at the CfD auction.

Why should solar auctions be regulated?

Clear regulations are essential for the substantial increase in solar and renewables, critical to achieving the EU's ambitious 2030 energy and climate goals. Our recommendations focus on ensuring tailored support and implementing the recently agreed Net-Zero Industry Act provisions in solar auctions across the EU.

Do competitive auction schemes allow emerging markets to procure solar generation?

Bottom Line: When procurement criteria and execution appropriately allocate risks, competitive auction schemes may allow issuers in emerging markets to procure solar generation at true market prices. Table 2: Competitive Procurement Process Design Criteria
