Which energy storage solutions will be the leading energy storage solution in MENA?

Electrochemical storage(batteries) will be the leading energy storage solution in MENA in the short to medium terms,led by sodium-sulfur (NaS) and lithium-ion (Li-Ion) batteries.

What is an energy storage system?

An energy storage system is charged from the grid or by on-site generation to be used at a later time to take advantage of price differentials. Energy storage is used instead of upgrading the transmission network infrastructure. The storage system provides the grid with the necessary output to ensure the voltage level on the network remains steady.

How to choose a technology for energy storage?

For energy storage, in addition to the stored electricity, the values accrued from stacked services such as spinning reserves, frequency regulation, and energy arbitrage are major criteria in the selection of technology and its applications.
