Which steel is best for PV mounting?

To do so, it requires a robust supporting structure made from high-quality steel with effective corrosion protection. With ZM Ecoprotect ® Solar, thyssenkrupp Steel now offering high-performance, zinc-magnesium-coated steels for PV mounting systems - durable, robust and sustainable.

What is Zm ecoprotect ® solar?

With ZM Ecoprotect ® Solar, we are clearly offering extra sustainability. It conserves resources through reduced use of zinc, it is 100 percent recyclable, and the entire portfolio is also available as blue mint ® Steel - our high-quality flat steel with reduced CO₂ intensity and the same excellent material and processing properties.

Are ZM coated steels good for roll forming?

ZM-coated steels are excellently formable and particularly suitable for roll forming. Their surface is harder than that of zinc coatings, which means significantly less abrasion is generated in the die, and this in turn reduces wear on the forming dies.
