What is the Solar Investment Tax Credit (ITC)? The United States Government has made it more affordable than ever to go Solar. New solar homeowners are eligible for an income tax credit up to 30% of the total cost of your new solar system. (This credit was recently increased from 26% and is secured at 30% through 2032 thanks to the Inflation Reduction Act.)

A permanently installed Generac home backup generator protects your home automatically. It runs on natural gas or liquid propane (LP) fuel, and sits outside just like a central air conditioning unit. A home backup generator delivers power directly to your home's electrical system, backing up your entire home or just the most essential items.

A power purchase agreement (PPA) is a financial agreement where a solar company will design and install a solar system on your home or business with little or no cost upfront. Instead of paying a monthly fee like a lease, the agreement includes a fixed price per kilowatt-hour (kWh) of electricity generated.

No matter what your power needs are, Maine Generator & Solar Power can help you find the exact fit for you. We can size your system for you to be sure your power is there when you need it! We also offer repair service, industrial engine over-hauls (diesel & propane), parts and preventative maintenance programs.

Fact: The average solar system installed helps remove around 75 tons of carbon emission from the atmosphere every year! Switching from fossil fuels to solar power in the state has the same emissions reduction effect as planting around 150 trees yearly!

Minhe home solar power generation installation

Also known as a "standby" generator, backup generators will automatically restore power to your house in the event of a Maine power outage. Here are the questions you should have answers to, and why Maine residents choose LaPlante Electric to provide them with reliable, safe standby generator installation and service.

The average home in Maine uses between 8,000 kWh and 12,000 kWh of electricity per year. The cost for a grid-tied, rooftop solar electric system designed to cover this electricity usage would have a direct purchase price between \$23,289 and \$31,260.

If you install solar batteries, you'll have the added benefit of being able to power your home or business during an outage. Most grid-tied solar energy systems are automatically turned off during a power outage to protect grid workers from unexpected power surges.

4 ???· Maine. \$13,461. 24.95 ¢/kWh. 583 : \$2,038. 6.61 : Maryland. \$12,401. 17.60 ... so keep in mind your climate as you factor in the best time to install solar panels on your home.

From finding them on Anjis list to meeting with veteran salesperson Dan to install 3 weeks later the LaPlante Electric team were first rate. All products were installed as promised with no surprises, multiple checks by phone or email to assure all was planned for and prepared as agreed upon at all at a price that reasonably met my exact needs.Part 2.

A standby home power generator keeps your power on during an outage. It's installed outside your house (like an AC unit) and comes on automatically -- whether you're home or away. All within seconds of a power outage. Plus, ...
