What Are Energy Storage Stocks? Energy storage stocks are shares of companies working in the energy storage and renewable energy industries. These industries are inextricably tied together due to renewable energy's inherent limitations. Renewable energy includes wind, solar, and hydropower, along with certain types of natural gas generation.

For decades, we've never truly needed massive, grid-scale energy storage systems. Energy was produced, (occasionally) transported, and then consumed shortly after. That's because with traditional energy sources, the energy is simply "stored" as raw fuel--such as coal or oil--until it's ready to be used. The plant then burns the fuel to generate electricity, ...
