

New Solar Power Plant Scam Revealed

Is going solar a scam?

It's likely a scam. While there are some government-funded solar programs for households that qualify, "going solar" isn't free. Honest businesses will tell you exactly how much it'll cost to get and install solar panels. Here's how to steer clear of the scams: Do some research.

Are free solar panels a scam?

Know that "free" or "no cost" solar panel offers are scams. The federal government does not install solar systems in homes for free. If you're considering whether solar energy is right for you, check out the Department of Energy's guide for homeowners and learn more. Or check out the Department of Treasury's guidance on clean energy.

Are 'upselling scams' causing a surge in solar panel fraud?

However, homeowners making the most of the Government's solar panel drive have increasingly fallen victim to conmen. Citizens Advice has warned of a surge in solar panel fraud, particularly "upselling scams" in which cold-callers convince customers to upgrade technology they already have to meet fabricated legal "standards".

How many complaints have been made about solar panels in 2022?

The Financial Ombudsman Service received more complaints mentioning solar panels in 2022 than in the previous eight years combined, Telegraph analysis reveals. Complaint numbers have sky-rocketed from a low of 15 in 2018, to a record high of 853 last year.

Are You at risk of a misleading solar panel scheme?

Thousands of households are at risk of falling victim to misleading solar panel schemes which are up by 50 per cent over the last year, data from Action Fraud reveals.

Are solar panels a scam or a cold call?

Here are the cold calls and potential scams to avoid. More than a third of solar PV panel owners in our recent survey told us they have been cold called about their panels in the past five years. Most cold callers were trying to sell them something unnecessary, but a few owners were told something completely untrue.

But perovskites have stumbled when it comes to actual deployment. Silicon solar cells can last for decades. Few perovskite tandem panels have even been tested outside. The electrochemical makeup ...
