Incorporating FFTA based safety assessment of lithium-ion battery energy storage systems in multi-objective optimization for integrated energy ... Fig. 1 illustrates the proposed framework, which harmonizes the safety assessment of lithium-ion Battery Energy Storage Systems (BESS) within an industrial park framework with energy system design.

This part sets five kinds of initial investment cost changes for energy storage: Fig. 10 depicts the economic impact of energy storage projects when the construction costs are 14, 14.5, 15, 15.5, and 16. According to the calculation results, the economics of energy storage projects steadily improve as energy storage construction prices decrease.
