

What is an ETN certificate?

The ETN certificate is specific to the French market. The process for obtaining an "equivalent" qualification differs between countries and even then, not every certification upholds or reflects the same standards.

Do you need an ETN certification in France?

Insurance companies in France have become more stringent on the requirements of the companies they insure. The ETN certification is no longer considered a bonus but is an absolute necessity for any solar mounting manufacturer operating in France.

Is reusol vs+ ETN certified?

Renusol's acclaimed VS+ system for on-roof mounting has been accredited with its ETN certification. A broad selection of components from the VS+ product range are now fully compliant and certified for solar projects of all shapes and sizes in France. Renusol launched its VS+ system in 2006.

How do I get an ETN for the vs+?

Renusol has entrusted independent body Alpes Contr&#244;les testing institute for obtaining an ETN for the VS+. Part of the scope of the certification is to prepare a technical document, wherein every technical functionality of the system is detailed. This comprehensive description includes:

Jul 4, 2013 - German solar mounting systems maker Renusol GmbH, a unit of Centrosolar Group AG (ETR:C3O), said Tuesday that its MetaSole mounting system has received the Certifie par ETN Ref. BT120019 certification in France. The certification was given by the Bureau Alpes Controles testing institute.

ETN (Enqu&#234;te de Technique Nouvelle) certification assesses innovative products and their adaptability to new technologies and industry standards. It ensures that products meet high performance and safety standards for photovoltaic installations.
