

Used for automatic interconnection of PV cell strings. An automatic bussing machine adopts induction welding and can be applied to 5BB-12BB solar cells of 156-210mm. ... to providing complete PV module manufacturing solutions for global customers within the photovoltaic industry like solar panel manufacturers. Our portfolio includes not only ...

Vertical Sorting Machine A vertical sorting machine is an automatic module sorter for sorting and sequencing of PV modules. The sorting machine supports flat and vertical sorting according to customer needs or panel powers. Discover more; ...

Trimming & Framing Machines The trimming machine can adapt to different sizes and shapes of panels and has a series of merits ... to providing complete PV module manufacturing solutions for global customers within the photovoltaic ...

An HiPot tester is an efficient and reliable insulation/withstand voltage tester which can test all kinds and sizes of PV modules. The tester features strong power resistance up to 5kVAC@40mA or 6kVDC@20mA, and can detect 0.01-12.00mAac and 0.001-5.000mAdc.

Suzhou Gaorun is global turnkey solar panel production line solutions suppliers, Headquartered in Suzhou, Jiang-su province, China. ... Seal the edge machine; Automatic Trimming; 90° visual inspection; Automatic Framing; JB welding machine ... Suzhou Gaorun is global turnkey solar panel production line solutions suppliers, Headquartered in ...

Auto Edge Taping Machine An automatic edge taping machine is used for automatic tape edge banding of dual-glass solar modules, adapting to different specifications of tapes. Discover more; **Auto Trimming Machine** The trimming machine can adapt to different sizes and shapes of panels and has a series of merits like high trimming quality, precision and speed, low noise and easy ...

Vertical Sorting Machine A vertical sorting machine is an automatic module sorter for sorting and sequencing of PV modules. The sorting machine supports flat and vertical sorting according to customer needs or panel powers. Discover more; **Auto String Taping Machine** The string taping machine has a range of advantages like adjusting tape width and length, short tape ...

Auto Trimming Machine The trimming machine can adapt to different sizes and shapes of panels and has a series of merits like high trimming quality, precision and speed, low noise and easy operation. Discover more; **Auto J-Box Potting Machine** An automatic J-box potting machine is composed of conveying, positioning and potting systems. The potting machine is used for ...

Double-glass solar module machines include second glass loading & placement machines and automatic edge taping machines. They are mainly used to load and place dual glasses and for glass edge banding. Horad provides the customized glass machineries for customers worldwide.

Auto J-Box Potting Machine An automatic J-box potting machine is composed of conveying, positioning and potting systems. The potting machine is used for automatic glue potting of PV junction boxes. Discover more; **EVA/TPT Cutting & Layup** An EVA/TPT cutting & layup machine adopts high-precision and reliable cutting and layup technologies to provide efficient solar ...

Investing in an automatic bussing machine offers numerous advantages for solar panel manufacturers. These machines significantly increase production efficiency and throughput by automating the bussing process, reducing cycle times, and minimizing labor costs. They ensure unparalleled precision and consistency in electrical connections through ...

An automatic J-box soldering machine is an efficient machine used for rapid and accurate soldering of PV junction boxes. Featuring higher precision and stability, the soldering machine can process various types of solar panels with less operation cost.

MS40K Stringer Machine MBB cell stringer machine of MS40K is an automatic machine used for serial connection between crystalline silicon solar cells. The soldering machine can be applied to 3BB~12BB solar cells of 156mm, ...

To the machinery and solar panel production equipment are then added a series of services provided by the equipment supplier, such as training activities prior to delivery of the line, the preparation of the layout with all the indication to the operating requirements, support for the purchase of raw materials, and more.

Cutting and layup machines are often used for automatical aligned positioning of cell strings in a solar panel production line. Horad provides three types of layup machines for solar panel manufacturers. ... Our portfolio includes not only automatic solar panel production lines, but also individual equipment for PV modules production, from ...

Trimming and framing machines are automatic equipment for trimming and framing processes in solar panel production line. Horad provide customers with trimming machines, corner grinding machines and framing machines. Our ...
