Evocells has been your photovoltaic specialist for over 15 years. We manufacture our own panels directly in Belgium. Through a network of partners or through our own care, they are installed professionally. Our team is also active in the installation of charging stations for electric cars.

The energy conversion efficiency and price of the three types of solar PV panels are different. You may purchase the appropriate type according to the design of your system and budget. Inverter is another key component of a solar PV system. It converts the output direct current of solar PV panel array into alternating current.

The two main types of panels are photovoltaic panels and solar thermal panels; photovoltaic panels will convert thermal energy into electricity, and solar thermal panels turn solar energy into heat. These can be used in conjunction with each other, but some financial aid schemes are applicable only to certain panel types.

(1) of the respective numbers of applications for installing PV systems on the rooftops of village houses which were received, approved and rejected by the Government since the implementation of the aforesaid arrangement, as well as the number of applications awaiting to be processed, with a breakdown by the height of the PV systems involved in the ...
