One 400 W plug-in balcony solar panel could save you around \$80 a year on electricity bills. This is considerably less than the \$483 a year that a 3.5 kilowatt (kW) roof-mounted solar panel system could save you. But then again, you can fit far fewer panels on a balcony than on a roof.

To connect solar panels in parallel, you require an additional component known as an MC4 combiner (or MC4 multi-branch connector), this name differs for other types of solar panel connectors. The image above illustrates a 4-in-1 MC4 combiner, but these components can be 2 in 1, 3 in 1, and so on.
