You should know that there are limitations for series solar panel wiring. In the U.S., solar strings are required to feature a maximum voltage of 600V, so solar arrays comply with article 690 section 7 of the National Electrical Code (NEC 690.7).

Based on thousands of quotes from the EnergySage Marketplace, the average home ground-mounted solar panel system costs about \$60,200 before incentives. But because most homeowners qualify for the 30% federal tax credit, you should expect to only pay \$42,140 upfront. Interest rates will increase the price tag if you choose to finance your system with a loan.
