

# Port of Spain energy storage tender opening

The competitive bidding process would see MITECO provide EUR150 million in grants for energy storage projects that are either standalone or paired with renewable energy resources, new or existing, including pumped hydro energy storage (PHES). Another EUR10 million would go towards thermal energy storage projects. As is normally the case with such tenders ...

Mozambique's Ministry of Mineral Resources and Energy has kicked off a tender for the development of decentralized solar and battery storage systems in the country.. The Energy Regulatory Authority is seeking two qualified independent power producers to develop, finance, build, own, operate and transfer two lots of solar-plus-storage projects in the ...

The government of Spain, through the Institution for the diversification and energy savings (IDAE) has awarded 880MW/1809MWh in its first tender for energy storage to be co-located with renewables. # Renewables # storage # batterie

The Spanish ministry for the ecological transition on Friday opened two funding programmes, providing a combined total of EUR 280 million (USD 310.4m) in state aid to advance energy storage projects. The first programme is set to allocate EUR 180 million -- EUR 150 million to support standalone energy storage projects, with thermal storage ...

Proof of this interest in the Spanish market is the company's choice of location to host its PowerTitan 2.0 Experience Day in Madrid - which Energy-storage.news attended - earlier this month, showcasing its latest product in energy storage systems to the European scene, where it targets to deploy 200MWh of Power Titan 2.0 systems this year, all between ...

The government of Spain is launching EUR280 million (US\$310 million) in grants for standalone energy storage projects, thermal energy storage and reversible pumped hydro to go online in ...

Spain is targeting 20GW of energy storage by 2030. This BESS was deployed by Ingeteam at a green hydrogen facility in Ciudad Real. Image: Ingeteam. The government of Spain is launching EUR160 million (US\$170 million) in grants for energy storage projects, aiming to fund 600MW of projects to go online in 2026.

In the previous round of generation and long-duration energy storage tenders, one LDES project was successful, a battery energy storage system (BESS) project proposed by RWE with 8-hours" duration, alongside three generation projects, as reported by Energy-Storage.news earlier this month.

# Port of Spain energy storage tender opening

In addition, new markets are in the process of opening up to storage, such as ancillary services." Last October, Spain's draft energy storage strategy was published, confirming the target to deploy up to 2.5GW of battery storage ...

The Council of Ministers has approved the Energy Storage Strategy, which will support the deployment of renewable energies and will be key to guaranteeing the safety, quality, sustainability and economy of electricity supply in Spain in the coming years. Energy storage systems are key to guaranteeing the transition to an

Global energy storage capacity was estimated to have reached 36,735MW by the end of 2022 and is forecasted to grow to 353,880MW by 2030. Spain had 88MW of capacity in 2022 and this is expected to rise to 2,500MW by 2030.

From this capacity Spain seeks to add for energy storage, it will also require to add 15GW of long-duration energy storage (LDES) in the coming years if the country seeks to ...

The GUVNL state-owned utility in the Indian state of Gujarat has invited bids to develop a total 200 MW/1.6 GWh of standalone BESS. Successful bidders will connect the eight-hour storage sites to the grid on a build-own-operate basis and offer energy storage to GUVNL for one-cycle charging and discharging operation daily, on an "on demand" basis, according to the ...

Winner of SECI's 1,000MWh pilot energy storage tender in India given green light to proceed. By Andy Colthorpe. January 19, 2023. Central & East Asia, Asia & Oceania. ... Developer Rolwind has won a favourable environmental impact assessment (EIA) result for a 200MW/800MWh BESS in Spain, the first standalone one to do so and the largest in ...

The future substation will be sited close to the port -- the Prince of Spain Pier. With the latest tender, the Port of Barcelona will have the first onshore power supply plants operating in the commercial docks. The port's MB92 yacht facilities are already equipped with shore connection plants.

Spain's government has approved an energy storage strategy that it says will put the country "at the forefront" of what is being done in Europe and help it move towards its 2050 climate neutrality target. The roadmap foresees the country ramping up its storage capacity from the current 8.3GW level to 20GW by 2030 and then 30GW by 2050.
