Thermal Energy Storage (TES) systems are pivotal in advancing net-zero energy transitions, particularly in the energy sector, which is a major contributor to climate change due to carbon emissions. In electrical vehicles (EVs), TES systems enhance battery performance and regulate cabin temperatures, thus improving energy efficiency and extending vehicle ...

The Pretoria West Power Station, in contrast, is in poor condition, with stripped switchboards and a dysfunctional railway line. It might be more feasible to replace the old power station with other options such as natural gas, HELE coal, small modular nuclear power or a combination of solar, wind and battery storage technologies.
