MODEL: GP-PV-200M. The GP-PV-200M, a 200-watt Solar Panel from Go Power!, is a high-efficiency monocrystalline solar module that provides outstanding performance and cost-effective solar power for high-end off-grid and mobile applications. This solar module is built to last and features a 25-year limited power output warranty.

For example, a 100-watt flexible solar panel is often used on boats, while 200-300-watt products are used on RVs or off-grid shacks. To meet their solar power needs, users often connect several solar panels to get the combined wattage they want. The solar panel wattage is directly proportional to its cost.
