A solar flashlight is a flashlight which can store energy from the sun, using solar power as a source of illumination when it is turned on. Typically, the flashlight has a small solar array embedded into the handle, making the flashlight easy to charge and use. Many outdoor supply stores sell solar flashlights, and it is also possible to order them directly from ...

A solar automatic transfer switch is a type of self-acting switch that is specifically designed for use with a solar power system. Solar ATS are typically installed so they connect to the grid, inverter, solar battery, and the load. When battery power goes down, the solar transfer switch will automatically connect your appliances to the grid.
