# Solar panel bottom rotating bracket

include a tracking system. For example, let's say you installed 15 ground-mounted solar panels that had a power rating of 300 ...

Framed solar panels up to 160W suitable for 12V battery banks with standard solar controllers. Large Solar Panels. Large solar panels up to 330W suitable for 24V systems and larger off grid systems. Lightweight Solar Panels. Crystalline silicon and thin-film panels that will bend to fit curved roofs on boats and motorhomes.

Use of the above brackets depends on the orientation of your unistrut. If the unistrut is running perpendicular to the solar panel then the most likely way to use these brackets would be on the top and bottom rails of the panel. Alternatively, you could use these brackets - also from Rich Solar - anywhere in any orientation.

Determine if you want the panel to be mounted vertically or horizontally. I was told it does not matter. I chose a horizontal mount. Install the Z-brackets to the panel ; Measure the distance from the top of one Z-bracket to the bottom of the other on the longest side, then measure across the panel from the end of one Z-bracket to the other.
