How do I choose a steel or aluminum PV support structure?

Ultimately, the selection of steel or aluminum for PV support structures depends on project-specific factors such as the size of the installation, load requirements, budget, site conditions (e.g., wind and snow loads, corrosive environments), and sustainability goals.

Which material should be used for photovoltaic (PV) support structures?

When it comes to selecting the material for photovoltaic (PV) support structures, it generally adopts Q235B steel and aluminum alloy extrusion profile AL6005-T5. Each material has its advantages and considerations, and the choice depends on various factors. Let's compare steel and aluminum for PV support structures:

What is the best material for a PV bracket?

This characteristic makes aluminum a suitable choice for PV installations in coastal areas or locations with high humidity. At present, the main anti-corrosion method of the bracket is hot-dip galvanized steel with a thickness of 55-80 mm, and aluminum alloy with anodic oxidation with a thickness of 5-10 mm.

How are solar panels mounted on concrete roofs?

Solar panels are mounted on concrete rooftops using RCC roof mounting devices. The distance between the solar array and the solar inverter is shortened by roof-mounted racks. A ground mount involves mounting solar panels to a rack structure joined to the ground steel beams or another metal post.

What materials are used for mounting base brackets?

Mounting base brackets are fabricated from Series 6000 structural marine grade aluminum. 5/16" hardware included. "L" Feet are fabricated from high-strength 3/16" aluminum and include a vertical slot for adjusting to irregular surfaces. 5/16" coated hardware included. "L" Feet are fabricated from high-strength 3/16" aluminum.

What is included in a power rail PV flash?

POWER RAIL PV Flash includes one universal slotted compression block, and one 8" x 12" flashing in matte, black color. L-Foot ordered separately. *MUST order in quantities of 10. The all aluminum Low Profile Tilt Kits mount a set of POWER RAIL extrusions (sold separately) at the tilt angle specified.

2? The application of CHIKO Solar Energy in the field of photovoltaic brackets. CHIKO Solar is a world leading manufacturer of solar brackets, headquartered in Shanghai and established in 2010. It has a production scale of 1000MW photovoltaic roof brackets and 1200MW photovoltaic ground brackets.
