

# Technical Specifications and Standards for Emergency Energy Storage Boxes

Are energy storage codes & standards needed?

Discussions with industry professionals indicate a significant need for standards..." [1,p. 30]. Under this strategic driver,a portion of DOE-funded energy storage research and development (R&D) is directed to actively work with industry to fill energy storage Codes &Standards (C&S) gaps.

What is a Rous code & standards for energy storage systems?

rous codes and standards for all energy storage systems. AES participates on technical committees such as the NFPA 855 on Energy Storage Systems that establishes standards for mitigating hazards associated with energy storage syste

Does industry need standards for energy storage?

As cited in the DOE OE ES Program Plan,"Industry requires specifications of standardsfor characterizing the performance of energy storage under grid conditions and for modeling behavior. Discussions with industry pro-fessionals indicate a significant need for standards ..." [1,p. 30].

How can utilities specify ESS characteristics?

As stated earlier,EPRI ESIC has developed detailed energy storage specifi-cations which utilities can use to specify ESS characteristics. The utilities,in their request for proposals,can specify which standards apply to meet the technical specifications.

Is ESS a black box?

The ESS was considered a black boxwith power exchange between the ESS and the grid being measured. From the working groups,performance metrics such as round-trip efficiency,ramp rate for real and reactive power,stored energy capacity at various percent of rated power,energy capacity stability,and standby energy loss were developed.

What safety standards affect the design and installation of ESS?

As shown in Fig. 3,many safety C&S affect the design and installation of ESS. One of the key product standards that covers the full system is the UL9540Standard for Safety: Energy Storage Systems and Equipment . Here,we discuss this standard in detail; some of the remaining challenges are discussed in the next section.
