

# Thailand energy storage planning

Will Thailand's transition to a low-carbon energy system save lives?

Thailand's transition to a low-carbon energy system will reduce air pollution in the energy sector, saving 27,000 lives over the next 30 years and reducing the risk of premature death from stroke, ischemic heart disease and lung cancer.

Does Thailand need a flexible energy plan?

As Thailand further accelerates its clean energy transition, the country should still consider using a combination of flexibility options in its long-term planning to accommodate greater ambition for renewable energy deployment.

What is the project towards a collective vision of Thai energy transition?

Acknowledgements The project, Towards a collective vision of Thai energy transition: National long-term scenarios and socioeconomic implications, was developed by CASE Thailand in collaboration with the Energy Policy and Planning Office (EPPO), Ministry of Energy, Thailand.

Does Thailand need a flexible power system?

While the Thai power system has significant latent flexibility and a high reserve margin, it will nevertheless need to adapt to the greater need for flexibility that comes with ongoing changes on both the demand and supply side. Thailand's power sector has two main avenues to enhance its flexibility.

Does Thailand have a solar power plan?

"The program is rather unexpected given the lack of such in [Thailand's Power Development Plan] 2018-37," Moritz Sticher, a senior adviser at Berlin-based consulting firm Apricum, told pv magazine. The regulation introduces a 25-year FIT of THB 2,1679 (\$0.057)/kWh for solar and a 25-year FIT of THB 2,8331/kWh for solar plus storage.

The Energy Conservation Development Plan aims to reduce energy intensity and consumption. The most important sectors where energy conservation is tackled are transportation (13,400 ktoe in 2030) and the industrial sector (11,300 ktoe in 2030). The Plan provides for background information, targets and strategies to achieve them.

Thailand's 2024 power development plan (PDP) aims to increase renewable energy use, highlighting the importance of BESS alongside solar panels and wind turbines. This could create new business opportunities for entrepreneurs if prices decrease or new ...

However, under the latest edition of Thailand's national Power Development Plan, published last month, the Ministry of Energy plans to procure 77.4GW of new energy capacity to meet growing demand. The peak is projected to grow to 56.1GW by 2037, while renewable energy's share of the electricity generation mix will

increase to 51%.

Thailand - 2.25-year FIT solar and energy storage plan Thailand's natural gas reserves are insufficient, coal quality is poor, and there is a large gap in electricity demand, about 13% of which depends on imports.

The share of renewable electricity in Thailand will need to climb rapidly in the coming decades toward Thailand's net zero target with CCS and hydrogen. However, renewables are only one side of the net zero equation in Thailand. A mix of technologies will be needed to make up the energy mix, as the LT-LEDS highlights.

The plan was expected to be released in the second quarter of 2024 but was again delayed with Thailand's Energy Policy and Planning Office (Eppo) saying it will now be published during the third quarter. In addition to the PDP, the NEP consists of the Gas Plan, Alternative Energy Development Plan, Oil Plan, and Energy Efficiency Plan.

Since the publication of its latest Power Development Plan (PDP) in 2020 (PDP 2018 Revision 1), Thailand has considerably increased its emissions reductions objectives, announcing a net zero greenhouse gas emissions target for 2065 and carbon neutrality for 2050.

Tunisian utility planning 600MW pumped hydro energy storage plant. ... Modern slavery development in Thailand. On 21 October 2024, the Cabinet of Thailand issued "Notification regarding Measures for Prevention and Suppression of Human Trafficking in Business Premises, Factories, and Vehicles" (the Cabinet Notification). ...

Thailand-based clean energy developer and investor Constant Energy has signed a Memorandum of Understanding with one of Thailand's largest companies, Siam Cement Group (SCG Cement), to deploy 50MW of C&I solar PV plants, with the company chief planning for an energy storage component on many of the projects. Franck Constant, CEO of Constant ...

One is to enhance the technical flexibility of the system through investment in flexible power plants, the electricity network, and storage and distributed energy resources. The other is to ...

There are currently few grid-scale energy storage projects in Thailand, although the situation is likely to change. In furtherance of its commitments under the Paris Agreement, the Thai government has enacted policies which envisage renewable energy accounting for the majority of grid capacity and output by 2040. With ongoing deployment of variable renewable ...

The Winners Are Set to Be Announced for the Energy Storage Awards! Energy Storage Awards, 21 November 2024, Hilton London Bankside. Book Your Table. ... (BESS) to date will be supplied to a solar PV-plus-storage project in Thailand by Sungrow. Vanadium flow battery player VRB gets US\$24m investment from Thai renewables company BCPG.

# Thailand energy storage planning

Sungrow is also supplier of BESS equipment to a Thai solar-plus-storage plant which will host Southeast Asia's biggest battery system so far, at 45MW/136.24MWh. Thailand's government is targeting 37% renewable energy in the energy mix by 2037, equivalent to just under 2.8GW of renewable generation.

Thailand's Power Development Plan (PDP) is the nation's roadmap for power generation, distribution and consumption. The PDP was updated in 2018 - with final approvals of the updates given in 2019. ... (EGAT). EGAT will focus on investing in large-scale floating solar and energy storage projects, while PEA ENCOM will be responsible for the ...

THAILAND'S ENERGY TRANSITION . 2024 OUTLOOK . Chandler MHM Limited . 17th and 36 Floors, Sathorn Square Office Tower. 98 North Sathorn Road . Silom, Bangkok, Bangkok 10500. Thailand. Tel. 66 2009 5000. ... 1 Energy Policy and Planning Office, Ministry of Energy. Electricity statistics

It consists of five plans: a power development plan, alternative energy development plan, energy efficiency plan, oil plan and gas plan. In tandem, a responsible government body is reworking the NEP to make 50% of electricity in Thailand from renewable energy sources by 2037.
