Of the 4.7 GW of installed energy storage capacity in the UK, battery energy storage systems (BESS) account for only about 2.1 GW. Most of the current capacity, 2.8 GW, comes from pumped hydro storage - a form of turbine-powered hydroelectric storage where water moves between two reservoirs at different heights. Although these systems are ...

Studies have shown that some groups of people, like women, are less likely to apply to a role unless they meet 100% of the job requirements. Whoever you are, if you like one of our jobs, we encourage you to apply as you might just be the candidate we hire. Across Octopus, we're looking for genuinely decent people who are honest and empathetic.

Energy trading starting to make up for UK ancillary service saturation . As Energy-Storage.news has previously written, revenues for UK battery storage projects have crashed year-on-year in 2023 after higher-than-expected performance in 2022 as the saturation of ancillary service markets like FFR (Firm Frequency Response) started to have an impact.

Energy Storage in the UK: An Overview. 2nd Edition. View report. The energy storage market has moved on since the first version of this REA report was published in autumn 2015, but the underlying drivers remain unchanged - a significant increase in renewable energy supplies amid growing demand for energy.
