In the past I've written about solar panel clamping zones which determine where, on a solar panel's edge, you can place the clamps that attach the modules to their mounting rails. What I didn't do was go into just where on a roof solar panels can and can't be installed. Depending on the roof mounting system used to attach the panels, there may be "exclusion ...

Under typical UK conditions, 1m<sup>2</sup> of PV panel will produce around 100kWh electricity per year, so it would take around 2.5 years to "pay back" the energy cost of the panel. PV panels have an expected life of least 25 to 30 years, so even under UK conditions a PV panel will generate many times more energy than was needed to manufacture it.
