

Yinghe technology energy storage equipment

Who is yinghe technology?

Yinghe Technology's first lithium battery complete line equipment was put into operation, winning customer praise. The company was listed on the GEM of Shenzhen, the stock abbreviation "Yinghe Technology", the stock code: 300457. YINGHE Huizhou industrial park was officially put into operation.

Who is yinghe battery manufacturer?

YINGHE has become the only manufacturer in China and even in the world with the capability to complete the whole line of lithium-ion and nickel-hydrogen new energy power battery equipment.

Who is Shenzhen yinghe technology?

Shenzhen Yinghe Technology Co., Ltd. was established in 2006, it was listed on the GEM of Shenzhen Stock Exchange in 2015, which is the first listed company in lithium-ion cell equipment industry.

What is Manz AG doing with China's Shenzhen yinghe technology?

Cylindrical battery cells. Image: Manz AG. Manz AG has signed an agreement with China's Shenzhen Yinghe Technology for strategic cooperation in lithium-ion cell and module production.

What is yinghe lithium battery automatic production equipment technology research institute?

The YINGHE lithium battery automatic production equipment technology research institute ("Institute" for short) was formally listed. The back-end equipment such as assembly line and liquid injection were put into the market, forming a complete equipment production line.

What is yinghe technology IPO plan?

YINGHE Technology officially launched the GEM IPO plan. The company launched a series of products, including coating machine, roller press and slitting machine, bring a step closer to the goal of "Providing a Complete Solution for Lithium Battery Production Automation". YINGHE Technology was awarded "National High-tech Enterprise".

Yinghe Technology adheres to the concept of "innovation-driven development", invests in technological innovation, builds a complete technological innovation system, focuses on the research and development of various lithium electrical equipment, and ensures the reliable and efficient operation of equipment. Many of the new energy automatic ...

The integration of equipment has become an important step for domestically produced equipment to lead the world. At present, the stability and maturity of domestic single equipment can compete directly with European and American equipment, and the upgrade of equipment integration plays an important role in improving

Yinghe technology energy storage equipment

manufacturing efficiency, reducing ...

In November 2015, China's first nickel-hydrogen power battery whole-line automation equipment went offline, successfully building a complete platform for new energy automatic production equipment. YINGHE has become the only manufacturer in China and even in the world with the capability to complete the whole line of lithium-ion and nickel ...

From June 18th to 20th, the Battery Show Europe 2024 is grandly held at Messe Stuttgart in Germany. At this grand exhibition that brings together the world's top battery technology and electric vehicle manufacturing companies, Yinghe Technology made a brilliant appearance with the industry's latest lithium battery intelligent equipment solutions, winning ...

Shenzhen Yinghe Technology Co Ltd is engaged in research and development, production, and sales of new energy intelligent automation equipment. The products of the company include ultrasonic welding, winding machine, square winding machine, automatic assembly line, injection machine, helium machine, and automated logistics system.

Manz AG, a global high-tech engineering company with a comprehensive technology portfolio, has signed a strategic cooperation agreement with Shenzhen Yinghe Technology Co. Ltd. in the Energy Storage segment. Yinghe, which is listed on the stock exchange, was founded in 2006 and is engaged in research and development, production and ...

Huizhou LONGHE Technology Co., Ltd, YINGHE's subsidiary, was founded in 2015, focusing on lithium battery intelligent assembly line and liquid injection machine, helium detector machine, single blue film machine and other equipment and the research and development, manufacture and sales of logistics line, Technology reached the international ...

It is reported that in 2018, Yinghe Technology has established a cooperation with LG Energy and jointly developed the world " s most efficient ultra-high-speed cylindrical winding equipment in just 8 months in 2019, which has been designated as dedicated model by LG Energy. In 2020, Yinghe Technology acquired the orders of 370 million ...
